We appreciate your visit to Hanyang University

Our historical mission and pride is to nurture leaders of challenges and exploration who will transform the world.

Hanyang University, a prominent traditional historical institution, is standing at the forefront of the current era's flow with anthropological social innovation "Love in Deed and Truth", encompassing education and research geared toward the future. At this momentous time when the energy of dynamism surges in anticipation of Hanyang's 100th anniversary, our historical mission and pride is to nurture leaders of challenges and exploration who will transform the world.

Hanyang University will proactively facilitate exchanges and collaboration with domestic and international institutions and organizations, while continuously creating and strengthening practical education and business that reflect the latest research trends and cutting-edge technologies. This means that the momentous time has arrived for Hanyang to take a historic leap toward the heart of the world, beyond its role as the Engine of Korea.

In the face of all these circumstances, we would like to find inspiration and optimism in the expressions of the Hanyang family, who are standing fast. Young lions, the core value of Hanyang University, should therefore be given a place to unleash their boundless powers and imagination. Ultimately, we believe this is the only way humanity can continue to exist.

Hanyang University will devote all its sincerity and effort.

Thank you very much.

President, Hanyang University **Ki-jeong Lee**

A message from Our Director

We all dream of a future defined by clean energy. As greenhouse gas emissions continue to grow and as extreme weather events become more frequent and harmful, the current efforts to move beyond fossil fuels appear inadequate. A move away from oil and gas will reconfigure the world just as dramatically. Even when the world achieves net-zero emissions, it will hardly mean the end of fossil fuels.

Australia, Chile, Japan, and Saudi Arabia have emerged as early adopters in trading low-carbon hydrogen and ammonia across borders and thus may be able to set infrastructure standards and certification norms for those new fuel sources.

A clean energy world has hammered home the importance of the supply chain for minerals such as cobalt, copper, lithium, nickel, and rare earths, which are critical to various clean energy technologies, including wind turbines and electric vehicles. In the estimation of the International Energy Agency, a world on track for net-zero emissions in 2050 will by 2040 need six times as much of the critical minerals as it does today.

I am very pleased to carry out the global energy technology policy convergence manpower training program with the support of the government. Hanyang University's Department of Global Climate Environmental Studies and the Institute for Energy & the Environment of Hanyang University (HY-IEE) have just been selected as the host university for the Global Energy Technology Policy Professional Program in August 2022.

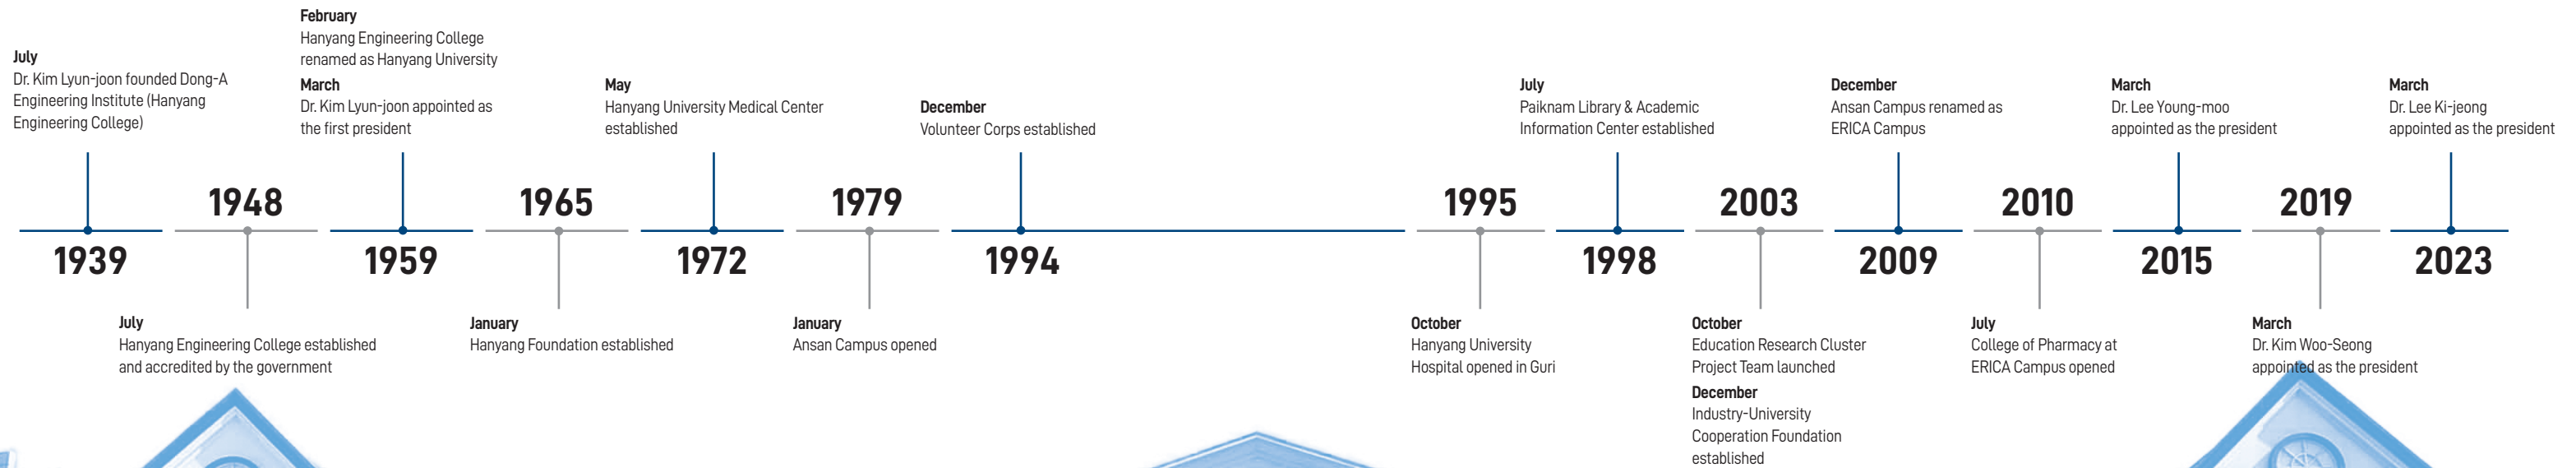

We welcome applicants from all over the world, from government and public sector policy makers to officials in energy-related ministries and agencies. We provide broadly based energy technology and energy policy education with focus on renewable & hydrogen energy and critical minerals technology policy.

Chair, Dept. of Global Climate Environmental Studies
 Director, Hanyang Institute for Energy & the Environment
 Director, Center for Global Circular Economy

Younkyoo Kim

The path that Hanyang has walked, reflects the development of Korea

Hanyang is pioneering a brighter tomorrow with powerful vision and strategies. We are taking the lead in the era of the 4th Industrial Revolution by fostering leaders who can contribute to humanity to bring about a hopeful future.

About Hanyang

Hanyang University

222, Wangsimni-ro, Seongdong-gu, Seoul, Republic of Korea | Since 1939

Hanyang University is a private research university in South Korea. The main campus is in Seoul, and the second one, the Education Research Industry Cluster or ERICA campus, is located in Ansan. Hanyang derives from the former name of the capital Seoul which was used during the Chosun Dynasty. Its motto and educational philosophy is Love in Deed and Truth. The university established the nation's first engineering institute (DongA Engineering Institute) in 1939 which became the founding facility of Hanyang University. It also established the first school of architecture and civil engineering in Korea.

Hanyang University has an alumni network of 330,000 that is not limited to the field of engineering but also to other fields. In 2018, the University was ranked 1st for the number of CEO alumni of venture companies in Korea. In 2019, QS World University Rankings ranked Hanyang University 150th.

The university welcomes over 7,400 foreign students each year and more than 3,000 students study abroad annually. Hanyang University counts the Massachusetts Institute of Technology, University of Cambridge, and Tsinghua University among its 820 partner universities in 88 countries.

Hanyang Institute for Energy and the Environment

Hanyang University leads in educational and research innovation by promoting collaboration between industry, academia, and universities, focusing on global environmental issues and adapting to carbon neutrality and energy paradigm shifts. The university, known for engineering excellence, cultivates inclusive leaders with a global perspective and commitment to social change. The engineering department established HY-IEE, a multidimensional institution concentrating on energy research and education, aiming to stimulate convergence research in energy and the environment. HY-IEE functions as a control tower, creating a core research group and infrastructure to guide research and education efforts.

HY-IEE aims to transcend traditional industry-academic research by connecting interdisciplinary teams, enhancing expertise, and fostering creative research through global convergence studies. The institute strives to establish a global industry-academic cooperation ecosystem and collaborates with various domestic and international partners to develop flexible, integrated education programs combining research, multidisciplinary approaches, and next-generation problem-solving. As a sustainable social innovation model, HY-IEE is dedicated to systematic research in energy and environmental fields to tackle challenges resulting from national development and global environmental changes.

HY-IEE features various research centers addressing areas like next-generation power, energy, nuclear innovation, energy conversion, storage, water, environment, sustainable urban systems, and the circular economy. Collaborating with Hanyang University's engineering colleges and other groups, the institute partners with numerous domestic and international research collaborators. HY-IEE seeks to elevate the university's research standing and contribute to national academic research and industrial development. Focusing on carbon-neutral, the 4th industrial revolution, and social innovation technologies, the institute is dedicated to improving human development, sustainability, economic growth, and quality of life.

HANYANG UNIVERSITY
Institute for Energy and the Environment

Energy

- Next Generation Power and Energy Center
- Future Nuclear Innovation Technology Center
- High Efficiency Energy Conversion Core Technology Center

The Best Energy-Environment Fusion Education Institute in South Korea

Times are changing faster than ever before. Today, we are on the brink of entering a new energy paradigm—reaching out to a carbon neutral world. Climate change is redefining every detailed aspect of our industries, and we are being asked to change whether we like it or not. With climate change hitting new heights year by year, our planet is becoming a more dangerous place to live.

There is growing need for environment-energy experts that can help guide the world through this new age. HY-IEE aims to produce these types of experts. With a great balance of academics and industry, our program is designed to raise students that can flexibly deal with real world problems.

About GETPPP-HYU

Hanyang University has introduced the 'Global Energy Technology Policy Professional Program' to educate international energy specialists from government agencies worldwide and build an international energy policy cooperation network. Sponsored by the Ministry of Trade, Industry, and Energy (MOTIE) of South Korea, the program focuses on renewable energy, particularly hydrogen energy, and securing critical mineral supply chains, distinguishing itself from similar programs at Seoul National University and Korea University.

The degree program will be conducted within the Department of Global Climate Environmental Studies, focusing on low-carbon policies and recent energy technology advancements. Courses are offered in English, and the co-hosting Global Circular Economy Center will collaborate with other centers within HY-IEE to keep students updated on the latest technological developments.

The program will cooperate with leading national institutes, such as KIGAM and KIER, as well as national corporations like KEPCO, KGS, and KOMIR. Multinational corporations, including SK Ecoplant, LG Energy Solution, Hyundai Engineering, and Dansuk Industrial Co. Ltd, will provide field practices for students to gain practical on-site experiences and learn about the latest industrial developments.

The Mission of GETPPP

Reflecting upon these changes of grave importance around us, GETPPP-HYU has set sight on the following.

Our Objectives

- Educating international energy and resource policy specialists on cutting-edge technologies and research.
- Constructing an international energy, minerals and energy technology policy network based on industrial, academic and governmental sectors.
- Promoting the development of governmental policy regarding energy and energy industries.
- Educating global pioneers to lead the advancement in technology and policies in the energy sector.
- Constructing a global platform to cope with the energy and resource shortages and promote low carbon economic development.

HYU Specific Objectives

- Developing secondary battery technologies.
- Fostering International standardization and cooperation.
- Creating a business model for a circular economy.

Curriculum

Degree Requirements

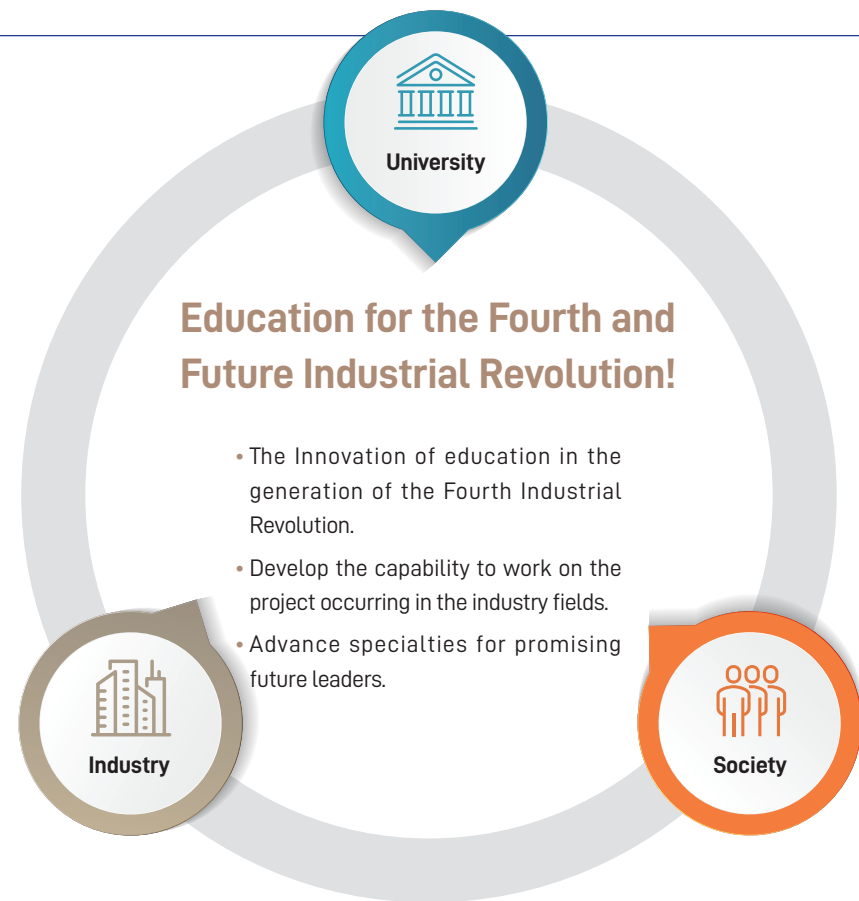

Program		Credits	Details
Master	Major (22 Credits)	1	General Electives
		6	Compulsory Major
		15	Elective Courses (IC-PBL)
	Research (5 Credits)	2	Master's Compulsory Thesis Study
		3	Master's Elective Thesis Study
Doctoral	Major (34 Credits)	1	General Electives
		9	Compulsory Major
		24	Elective Courses (IC-PBL)
	Research (4 Credits)	4	Doctoral Thesis Study

General Requirements

Course	Classification	Credit	Year	Semester
Strategy for Carbon Neutrality	Elective Major	3	Every Even Year (2024)	Spring
Business Innovation in Circular Economy	Elective Major	3	Every Even Year (2024)	Spring
Understanding International Organization for Standardization	Elective Major	3	Every Even Year (2024)	Spring
Strategy for Climate Change Negotiation	Elective Major	3	Every Even Year (2024)	Fall
Sustainable Finance: Current Trends & Prospects	Elective Major	3	Every Even Year (2024)	Fall
Resource Circulation and the Global Economy	Elective Major	3	Every Odd Year (2025)	Spring
Sustainable Finance and ESG Investment	Elective Major	3	Every Odd Year (2025)	Spring
Analytical Method for the Effect of Energy Technologies	Elective Major	3	Every Odd Year (2025)	Spring
Advances in Bioenergy	Elective Major	3	Every Odd Year (2025)	Spring
Low-Carbon Technologies and Policies	Elective Major	3	Every Odd Year (2025)	Spring
Fuel Cell Science and Technology	Elective Major	3	Every Odd Year (2025)	Spring
Special Seminar on Feasibility Study of Resources	Elective Major	3	Every Odd Year (2025)	Spring
Advanced Separation Technology	Elective Major	3	Every Odd Year (2025)	Spring
Analytical Methodology of Climate Change Policy	Elective Major	3	Every Odd Year (2025)	Fall
Corporate Participatory Projects	Elective Research	3	Every Odd Year (2025)	Fall
Environmental Management and Econometric Analysis	Elective Major	3	Every Odd Year (2025)	Fall
Manufacturing Process for Energy Storage Devices	Elective Major	3	Every Odd Year (2025)	Fall
Advanced Resources Recycling Engineering	Elective Major	3	Every Odd Year (2025)	Fall
Environmental Economics	Compulsory Major	3	Every Year	Spring
IC-PBL: Circular Economy and Recycle Business	Elective Research	3	Every Year	Fall
Resource Economics	Compulsory Major	3	Every Year	Fall
Master's Thesis Study	Compulsory Research	2	Every Year	Spring & Fall
Doctoral Thesis Study 1	Compulsory Research	2	Every Year	Spring & Fall
Doctoral Thesis Study 2	Compulsory Research	2	Every Year	Spring & Fall

Please note that the courses offered may change each semester to ensure alignment with the latest educational standards and best practices.

IC-PBL

Industry-Coupled Problem-Based Learning(IC-PBL) is a learner-centered educational model wherein learners solve context-rich problems occurring in real-life fields, coupled with industry, society, and university. GETPPP-HYU program applies the IC-PBL education model with co-hosting research institutes, national corporations, and leading companies of Korea to help students gain practical experience in the industry fields.

Partnered with

KOREA ELECTRIC POWER CORPORATION

KOREA GAS SAFETY CORPORATION

Special Programs

Korean Language and Culture Programs

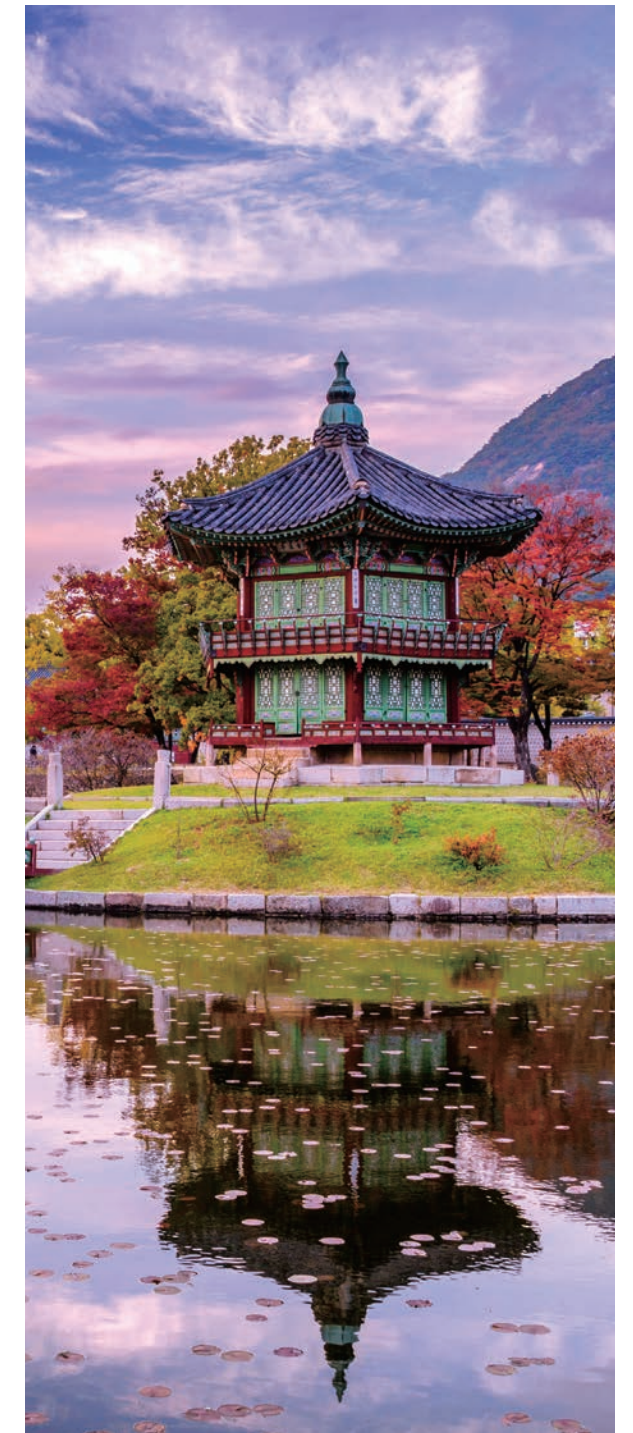

GETPPP-HYU offers Korean language courses operated by the Hanyang Institute of International Education. Korean language courses are available for all students enrolled in GETPPP-HYU program during the semester. By learning the basics of Korean, language barriers during the stay in Korea will be minimized. The program also offers vast Korean cultural experiences in South Korea. The cultural program will engage students in various cultural activities including cultural heritage visits and Korean cooking classes.

Academic Seminars

GETPPP-HYU invites energy specialists and policymakers to be updated on the latest developments in the field of hydrogen energy and critical minerals. Through interactions with leaders and specialists, students can gain practical knowledge in the field of energy policy.

Field Trip and Internship

To gain a full picture of how energy industries in Korea operate, GETPPP-HYU provides field trips to main facilities of leading Korean companies and national corporations in the field of hydrogen energy and critical minerals. Internship opportunities are also available at leading national research institutes for students who are interested in the field.

Campus Life

Hanyang Institute of International Education

Hanyang University offers a systematic and intensive Korean language course for foreigners, focusing on communication-oriented speaking, listening, reading, and writing. The program aims to improve communicative competence based on life in Korea. Drawing from extensive experience in practical language education, Hanyang University teaches Korean to over 3,000 foreign students annually. Classrooms are well-equipped with audio and video facilities, providing an efficient learning environment. Students of various nationalities enjoy a fulfilling school life, and a 1:1 Korean mentoring program is available for those who wish to engage in conversation sessions with Hanyang University's Korean students.

Website: <https://iie.hanyang.ac.kr>

HYU Residence Hall

Students joining Hanyang University have the option to apply for on-campus housing at the HYU Residence Hall. Conveniently located within walking distance from classrooms, the five dormitories are segregated by gender but situated in close proximity to each other. Room options include shared accommodations for two, three, or four students. It is strongly advised that incoming students enroll for dormitories for their first semester in Korea to fully experience campus life. However, students who prefer not to live in dormitories must arrange their own housing independently.

Dormitories

Type	Gender	Dorm Name	Capacity	Fee (6 months)	Note
On Campus	Male	Techno	2 persons	About KRW 700,000 ~ KRW 2,300,000	※ Fixture and facility in room: closet, desk, bookshelf, chair, air conditioner ※ Techno dorm for 4 persons: - 2 rooms:1 room for a single bed, 1 room for triple beds.
			3 persons		
			4 persons: consist of two rooms (1+3 persons)		
	Female	Residence hall 1	4 persons		
			Hannuri hall		
Gaenari hall	2 persons				
	Residence hall 1	1 person			
			3 persons

Application

Eligibility

1. Applicants with foreign nationality whose parents both have foreign nationality
 - As of the application date, students and their parents should acquire foreign nationality
 - If the students and their parents have dual citizenship, they both should lose their Korean nationality before the application date
2. Academic background:
 - Candidates for the Master's Program are required to hold a Bachelor's degree.
 - Candidates for the Doctoral Program are required to hold both Bachelor's and Master's degree.

Scholarship

- The successful applicants will be granted the following scholarship:
- Full tuition fee exemption (Master: up to 2 years / Ph.D.: up to 3 years)
 - One-way airfare
 - Stipend: 1,800,000 KRW monthly income (pre-tax 8.8% as of 2023)
 - Foreigner insurance and visa processing fee
 - Korean language and culture program

Schedule

Procedure	Schedule	Note
	2024 Spring Semester (March)	
Guideline Announcement	August 1, 2023	Downloadable from the OIA website (http://oia.hanyang.ac.kr)
Online Application	September 1 (10:00) ~ October 6 (17:00), 2023	Check the notice before the online application (http://oia.hanyang.ac.kr) - Refer to Appendix for the list of required documents (p.22) - Submit by post or visit to below address [Address] Office of International Affairs, Room 218, International Building, Hanyang University, 222 Wangsimni-ro, Seongdong-gu, Seoul (04763), Republic of Korea
Required Documents Submission	September 1 (10:00) ~ October 11 (17:00), 2023	
Result Announcement	December 13, 2023	Available only on OIA website (http://oia.hanyang.ac.kr > Admissions > Regular Admission Result)
Tuition Payment	January 2024 (tentative)	- Refer to the 'Guidelines for newly accepted candidates' after the result announcement - Must make the payment to an individually assigned virtual account
Course Registration Orientation	To be informed by each department office	Time and venue will be announced
Freshmen Orientation	February 29, 2024 (tentative)	
Semester Begins	March 2, 2024	

※ The dates are subject to change due to the COVID-19 situation and all admission notifications will be posted on the OIA website (<http://oia.hanyang.ac.kr> > Admissions > Notice).

※ All dates and times are based on Korea Standard Time (KST).

※ Applicants must submit all required documents by the deadline. Those who do not comply may be disadvantaged.

※ Applicants are not allowed to change their application information once they have completed it, so please make sure to fill out the application form correctly before submitting it. The university is not responsible for any result caused by missing or false information written in the application.

- Be careful not to make any mistakes when you write your name (both in Korean and English), date of birth (YY/MM/DD), passport number, ARC number, type of Visa, contact number, address, and e-mail address.

* Please note that ALL applicants must make their submissions online via oia.hanyang.ac.kr.

1. Check application guidelines at oia.hanyang.ac.kr after Aug.1

- It is recommended to express your intention to apply for the program via email (gcec@hanyang.ac.kr) before the application period.
- Email us for any inquiries about the Program.

2. Fill in the online application form (Sep.1 ~ Oct.6 17:00 KST)

- 1) Application form & Personal Statement and Study Plan
- 2) Required documents may differ each semester, so please check prior to admission

3. Submit required documents (Sep.1 ~ Oct.11 17:00 KST)

- 1) Application Form and 2) Personal Statement and Study Plan
 - Submit required documents according to the admission guideline.
 - It is strongly advised to prepare for required official documents IN ADVANCE, as it may take weeks for an apostille or consular confirmed documents.

4. Screening and Interview Process (TBA)

- The admission committee will go through the document screening process.
- Online interviews will be conducted a few weeks after final submission.
- It is strongly advised to send all required documents by post as soon as documents are ready, as the University may request missing documents.

5. Result Announcement

- Final results will be announced on December 13, 2023. (Available on OIA website)
- No cancellations can be made after registration as GETPPP is a sponsored program. Withdrawal may result in restitution by the applicant.
- The Office will provide individuals with details on visa, housing alternatives, etc.
- Please note that disqualified students may not be informed by our administration team.

Appendix

Required Documents

- Copy of the Application Form
 - Personal Statement and Study Plan
 - Master's Program : Bachelor's Degree Certificate
 - Ph.D. Program : Bachelor's and Master's Degree Certificate
 - Master's Program : Official Transcript of Bachelor's Degree (All semesters)
 - Ph.D. Program : Official Transcript of Bachelor's and Master's Degree
 - A Copy of the applicant's passport (Non-passport holders can submit ID cards)
 - A Copy of both parent's passports (Non-passport holders can submit ID cards)
 - Original Official Document proving the family relations between the applicant and his/her parents
- * Refer to [Document verification, page 24] for more detail on verification by the Korean Embassy or apostille of required documents.

Document Submission Instructions

- All required documents must be kept ready and submitted before the submission deadline.
 - All submission must be finalized by the expected due date. No compromise can be made, so please be attentive to the provided schedule.
 - Applicants shall be responsible for any consequences caused by not following the above.
 - Contact hygce@hanyang.ac.kr for questions about admission.
 - gcec@hanyang.ac.kr for program details.
- All documents must be submitted to the office by post or in person.
- Every document should be in A4 format and submitted in the order specified in the document submission list.
- Documents that are not written in Korean or English must be accompanied by notarized translations into either language.
- To legalize academic degree certificates, please request certificate to relevant organization.
- If the contents of the documents differ following the academic background check, admission may be revoked even after enrollment.
- It is the applicant's responsibility to ensure that all required application materials are submitted.
- Other supporting documents (such as a certificate of achievement or a license) must be notarized in Korean (or English).
- ALL submitted documents including supporting materials will NOT be returned to the applicants. We advise applicants to prepare additional documentation for visa applications.
- The valid date for the notarized documents are 12 months (issued after September 1st, 2023 only valid). There's no expiration date for a consular confirmed or apostille documentation.

List of Required Documents

Please contact OIA office for inquiries on Required Documents.

Document Verification

It is strongly advised to prepare for required official documents in advance, as it may take weeks for an apostille or consular confirmed documents.

• Introduction for submitting a document to prove the academic history from overseas institutions

- All applicants except those who have graduated in China must submit an official diploma or degree and an official academic transcript verified by one of the following verification method stated below during the designated period.
- Apostilled Official diploma or degree and official academic transcript
- Official diploma or degree and official academic transcript verified by a Korean Embassy

• Information on Apostille Convention

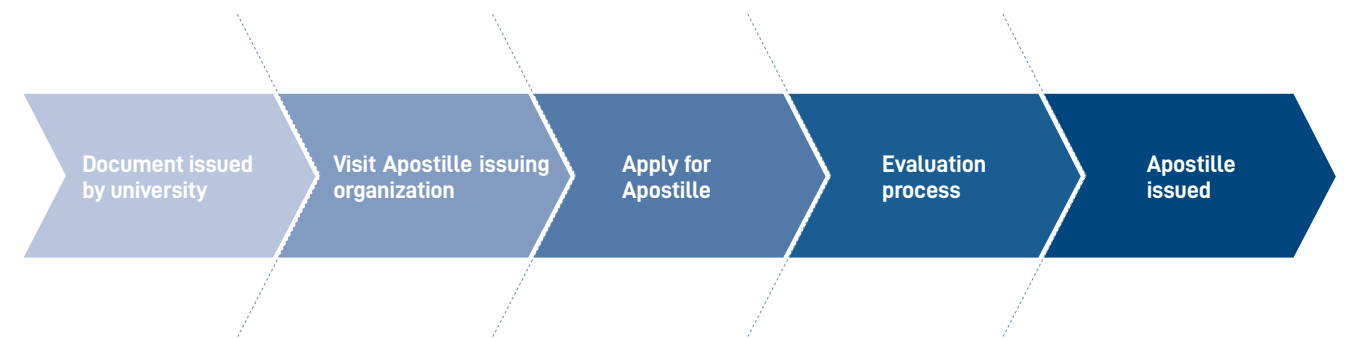

1. Apostille Convention

- The Republic of Korea became the 90th Contracting State of the Apostille Convention (Convention Abolishing the Requirement of Legalization for Foreign Public Document), effective as of July 14, 2007
- Apostille is a certificate specifying the modalities through which a document issued in one of the signatory countries can be certified for legal purposes in all the other signatory states Apostille convention countries abolish the complex consular procedures to ensure the mutual authentication of public and official documents (Apostilled documents have the same effect as documents verified by diplomatic offices)

2. Apostille Convention is an international treaty drafted by the Hague Conference on Private International Law: You can check out detailed updated information regarding regional authorities at www.hcch.net

• The procedure of issuing Apostille
